**Introductory Comments**

Dear Sir:

The following is a response to the Office Communication of August 30, 2007. In that communication, the Office objected to the drawings for failing to comply with 37 CFR 1.84(p)(5), suggested amendments to the specification for correction and clarification, objected to the length of the abstract, and suggested amendments to the claims for correcting grammatical errors, for maintaining consistency, and for addressing redundancy. Applicant has amended the specification to eliminate the interpretation of item numbers as reference designations, amended the specification as suggested by the Office for correction and clarification, provided a substitute abstract, and amended the claims as suggested by the Office.
